

Permit Number - ND2016-17565

State of North Dakota
Temporary Water Permit
SWC Project No. 1400A

In response to an application for a temporary water permit dated Jun 16, 2016 as received in this office Jun 20, 2016, authority is hereby granted to:

Dakota Access, LLC
1300 Main Street
Houston, TX 77002

Contact Person: Monica Howard

Telephone (713)989-7186

A Temporary Water Permit as follows:

Source: Beaver Creek

Point of Diversion: SW1/4 NW1/4 Sec. 09 Twp. 132 Rng. 077

Nature of Use: Hydrostatic testing

Total Quantity of Water: 20,000,000.0 Gallons

Maximum Withdrawal Rate: 2,000.0 gpm

Period of authorized usage: Jul 27, 2016 through Dec 31, 2016

Conditions

This temporary water permit is granted subject to use from the source by senior appropriators. Permission for access to the source must be obtained from all affected landowners. Failure to comply with any order of the State Engineer may result in forfeiture of this permit. The granting of a temporary water permit does not create a water right. Temporary water permits are not transferrable. Temporary water permits cannot be modified.

The total quantity of water listed above is 61.3 acre-feet.

This temporary water permit is issued subject to water use from the source by senior appropriators.

Permit Holder must contact the North Dakota Department of Health at 701.328.5210 to complete and file NPDES Short Form C prior to discharging waters back into the waters of the state.

An amount of water sufficient to provide water for livestock downstream must be allowed to flow pas the point of diversion at all times when water is being withdrawn under this temporary water permit.

Dated: Jul 26, 2016

Permit Number - ND2016-17565

**State of North Dakota
Temporary Water Permit
SWC Project No. 1400A**

Failure to comply with any order of the State Engineer may result in forfeiture of this temporary water permit. This includes the withdrawal of water that is not authorized.

The amount of water withdrawn daily from this source under this temporary water permit must be provided to the State Engineers Office on a weekly basis from the date of issue through the termination date of this Temporary Water Permit. This includes all weeks that water is not withdrawn or weeks that the project is shut down for any reason. The weekly summary of the date and the amount of water withdrawn can either be faxed to 701.328.3696 or e-mailed to dfarrell@nd.gov once every week.

Holders of Temporary Water Permits with Construction Use must complete the Annual Water Use Report for each calendar year that the Temporary Water Permit is authorized. Annual Water Use Reports for Industrial Use Temporary Water Permits are due in the State Engineer's Office within 30 days of the close of the calendar year or within 30 days of the close of the authorized period of the Temporary Water Permit. Failure to comply with any order of the State Engineer may result in the forfeiture of this permit.

A weatherproof copy of this Temporary Water Permit must be attached to equipment withdrawing water and must be available for inspection by representatives of the State Engineers Office or the State Water Commission.

This temporary water permit is subject to the installation of real-time monitoring (telemetry) at the expense of the permit holder upon notification from the State Engineer.

Date: July 25, 2016

JP 7/27/16
W.S. 7/27/16
DAN 7-26-16

The State Engineers Office received an application for a temporary water permit from Dakota Access, LLC on 6/16/16. This application requested the authorization to use 61.4 acre-feet of water at a maximum rate of withdrawal of 2000 gallons per minute from "Beaver Creek". The requested point of diversion (POD) listed on the application is at 13207709BC of Emmons County. The requested period of withdrawal was 7/1/16 through 4/14/17. The nature of use for the proposed allocation was listed as "Hydrostatic testing", which is cataloged as "Construction".

A hydrologic review was completed as a part of the review process for the temporary water permit application.

The hydrologic review of the proposed pumping from the POD on Beaver Creek, in the Maier Lake-Beaver Creek sub-watershed, Beaver Creek-Lake Oahe watershed, and Beaver sub-basin will not adversely affect existing rights.

Therefore, the temporary water permit application submitted by Dakota Access, LLC to withdraw 61.4 acre-feet of water at a maximum rate of 2000 gpm from the above listed source for a timeframe beginning 7/27/16 and ending 12/31/16 is recommended for approval with the conditions attached to this permit.
